Logitech® Cordless Optical Mouse for Notebooks

Cordless • Mac • Optical • PC • Scroll wheel • Travel-size • USB

It's the perfect companion for any notebook computer: a cordless, compact, comfortable optical mouse that goes wherever you go. It's mobility without compromise, only from Logitech.

Here's the mouse designed from the ground up for people on the go. Logitech's Cordless Optical Mouse for Notebooks expertly combines an elegant, compact shape with the advanced features that mobile warriors require. With its convenient carrying case, it's easy to pack it up and take it anywhere. When you're ready to use it, just pop the sleek USB receiver into your notebook and start pointing, clicking, and scrolling. Logitech's Fast RF cordless technology delivers all the convenience and freedom of cordless, with no compromise in performance. And because it's optical, you can use it on almost any flat surface and never clean a mouse ball ever again.

- Portability: Take this compact mouse anywhere and store it in the carrying case when not in use
- Freedom: Logitech's Fast RF technology means cordless without compromise
- Convenience: Enjoy smooth operation thanks to the advanced optical sensor that doesn't require a mouse pad
- Comfort: Use it with either hand

Mobility Without Compromise

- Compact size is easy to toss into a briefcase but comfortable enough to use as your regular mouse in either hand
- The small, sleek USB receiver plugs easily into your notebook
- Fast RF cordless technology delivers the responsiveness and accuracy of a corded device... but without the clutter
- Advanced optical sensor provides smooth, trouble-free operation... no mousepad required
- Carrying case makes it easy to pack up and take anywhere
- On/off switch maximizes battery life
- Comes with four pre-programmed buttons, or customize them yourself with Logitech MouseWare® software
- Five-year limited hardware warranty
